1. Getting started

Signing in

An admin creates your account and gives you an email and password — staff **cannot sign up on their own**. Open the app, enter your email and password and sign in. **Remember me** is ticked by default so you don't have to type them again next time; untick it on a shared device.

Language

The app is available in Vietnamese and English. To switch: on a computer, open the account menu at the bottom of the left sidebar; on a phone, tap **Menu** in the bottom tab bar → **Language** → **English**. This guide uses the English labels.

Who does what

The admin assigns a **department** to every account. Your department decides what you see in **Tours**:

Customer Care

Books appointments. Creates a tour when a customer comes in for a treatment. Sees the table of all tours in the month.

Technician

Takes tours, fills in the service detail and bill, takes before/after photos. Views their own tours and earnings by month.

Admin

Reviews and confirms tours, assigns/changes technicians, exports Excel and prints tour slips.

> **Not seeing the right screen?** (e.g. a technician opens Tours but there is no "Waiting" tab) — your account has no department yet. Ask the admin to set it under **Users**.

Navigation

- **On a computer:** the menu is in the left sidebar — **Customers**, **Appointments**, **Tours**.
- **On a phone:** the tab bar at the bottom — **Customers · Appointments · Tours · Menu**. **Menu** holds your account, dark mode, language and **Sign out**.

Install the app on your phone (recommended for technicians)

- **iPhone (Safari):** open the app → tap **Share** → **Add to Home Screen**.
- **Android (Chrome):** open the app → tap ⋮ → **Add to Home screen** (or **Install app**).

General tips

- After each action a small message appears at the top: e.g. "Saved" (success) or a red error message. If you see an error, read it — it usually says exactly what is wrong.
- Deleting always asks for confirmation first.
- On a phone, tables automatically switch to a **card list** that is easier to read.
- A customer must already exist under **Customers** before you can pick them for an appointment or a tour.

2. Appointments

What are appointments for?

Appointments are the **log of when customers are scheduled to visit the clinic**. Each appointment tells you:

- **Who** is coming, **when** (date & time), for **which service**, and **which Customer Care** staff is in charge,
- And most importantly: whether the customer **has arrived** (the "Clinic confirmation" column).

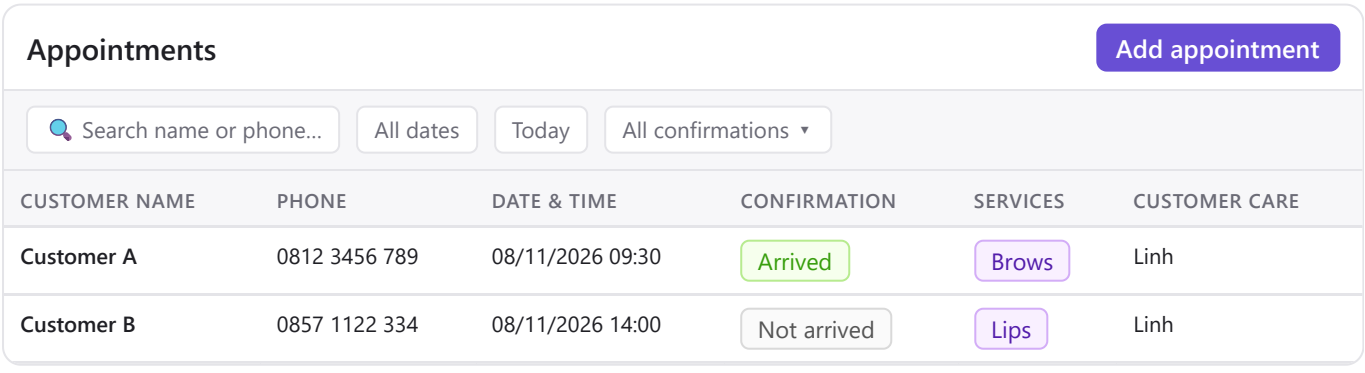

This way the whole team knows who is coming today, who hasn't arrived yet and needs a reminder call, and reports can count appointments and arrivals.

> **Appointments do NOT record money or technicians.** The bill, payment, technician and before/after photos all live in **Tours** (sections 3–6). When a customer comes in for a treatment: mark them **Arrived** in Appointments, then **create a Tour** for them.

Add a new appointment

1. Go to **Appointments** → click **Add appointment** at the top right. A form slides in from the right.
2. **Customer name** (required): type a name or phone number to search, then pick the customer. Not found → create the customer under **Customers** first.
3. **Appointment date & time** (required): when the customer will come.
4. **Clinic confirmation**: leave it at `Not arrived`. Only switch to `Arrived` if the customer is already here.
5. **Services**: pick one or more services the customer is booked for.
6. **Customer care**: the CC staff in charge (usually you).
7. **Note**: anything to remember (what the customer wants, deposit paid, who they come with…).
8. Click **Add appointment** at the bottom of the form to save.

Find and filter appointments

Appointments screen (sample data)

Type a name / phone in the search box; pick a date or click `Today` to see that day (clear the date to see all); filter by *Not arrived* to get the list of customers to call.

Update appointments right in the table

No need to open a form — click the cell, pick the new value and it saves automatically:

TO DO THIS	DO THIS
Customer has arrived	Click `Not arrived` in the *Clinic confirmation* column → choose **Arrived**. Clicked by mistake? Switch it back to **Not arrived**.
Customer reschedules	Click the date in the *Date & time* column → pick the new date and time.
Change / add services	Click the *Services* cell → tick or untick services.
Change the CC in charge	Click the *Customer care* cell → choose someone else.
Add a note	Click the *Note* cell, type, then **click outside the cell** to save.
Delete an appointment (created by mistake, customer cancelled)	Click ⋮ at the end of the row → **Delete appointment** → confirm.

> **Daily routine (Customer Care):**
>
> - Start of day: click `Today` + filter *Not arrived* → call to remind customers.
> - Customer at the desk: switch to `Arrived`, then **create a Tour** for them (section 4).
> - Customer reschedules: change the date & time right away and write the reason in Note.

3. The tour workflow from start to finish

A **tour** is one actual treatment at the clinic: which technician did it, service detail, bill, payment method and before/after photos — from which the technician's **received** amount (commission) is calculated.

CUSTOMER CARE
Create tour
`Waiting`
Date, customer, service, (bill), note.

→

TECHNICIAN
Take & fill in
`Unconfirmed`
Service detail, session, bill, payment, before/after photos.

→

ADMIN
Review & confirm
`Confirmed`
The tour is locked and counts toward the technician's confirmed earnings.

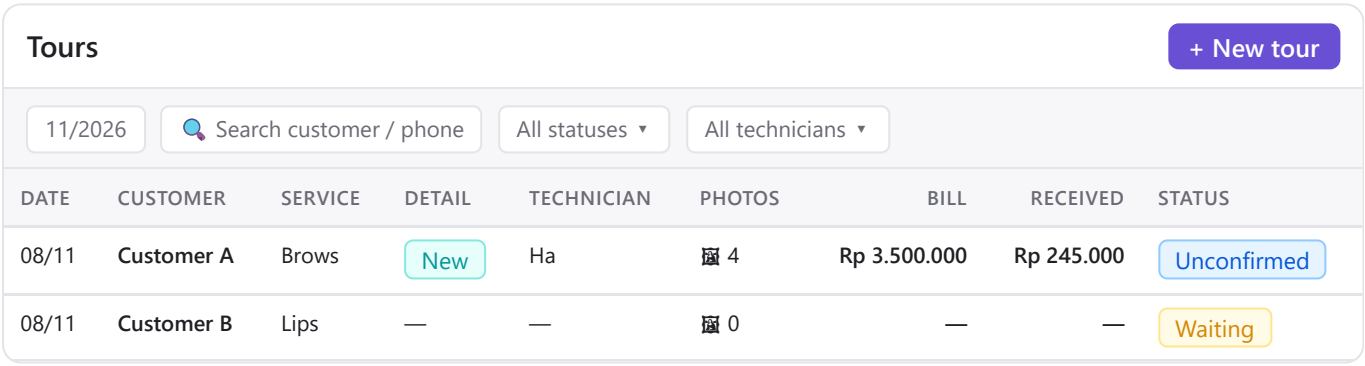

STATUS	MEANING	WHO CAN EDIT
`Waiting`	Created, no technician has taken it yet.	Customer Care, admin
`Unconfirmed`	Taken by a technician; waiting for admin review.	Its technician, Customer Care, admin
`Confirmed`	Approved by admin. Details are locked.	Admin only

4. Creating a tour (Customer Care)

Create a tour when the customer has arrived and is about to be treated — so a technician can take it.

1. Go to **Tours** → click **+ New tour**.
2. **Date**: today by default; only change it when entering a tour for another day.
3. **Customer** (required): type a name or phone number to search.
4. **Service** (required): the service the customer is getting (e.g. brows, lips…).
5. **Bill** (optional): if you already know how much the customer pays, enter it now so the technician doesn't have to.
6. **Note**: what the technician should know beforehand (sensitive customer, special request…). Technicians can read it right on the waiting card.
7. Click **New tour**. The tour appears in the **Waiting** tab on every technician's phone.

View, edit, delete tours

Customer Care tour table (sample data)

- **Filter:** pick a month, search customer/phone, filter by status or technician. The 4 figures above the table show the number of tours, waiting, unconfirmed and the total received.
- **View / edit:** click a row to open the details. Customer Care can change the date, customer, service, bill, payment, note… while the tour is **not yet confirmed**, then click **Save**.
- **Quick photo view:** click the photo icon + count in the *Photos* column.
- **Delete:** ⋮ at the end of the row → **Delete**. Customer Care can only delete tours **they created** that **no technician has taken**. To delete a taken tour, ask the admin.

> **Avoid duplicates:** before creating, search for the customer's name to check whether they already have a tour today.

5. Taking a tour, filling in details, taking photos (Technician)

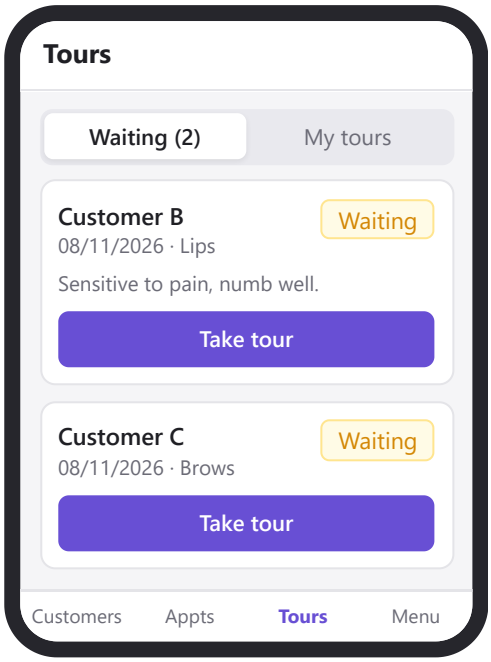

Technicians use the app on their **phone**. Open the **Tours** tab at the bottom — it has 2 tabs: **Waiting** and **My tours**.

Step 1 — Take the tour

1. Open the **Waiting** tab. The number in brackets is how many tours are waiting. Each card shows the customer, date, service and the CC's note.
2. Find the customer you are about to treat → tap **Take tour**.
3. The app shows "Tour taken", switches to **My tours** and opens the tour so you can continue filling it in.

> If two people tap at the same time, only the **first one** gets the tour. The other sees "**This tour was already taken**" — nothing else to do.

> **Took the wrong tour?** Open it → tap **Return tour** → confirm. It goes back to the Waiting list for someone else. You can only return a tour that the admin **has not confirmed** yet.

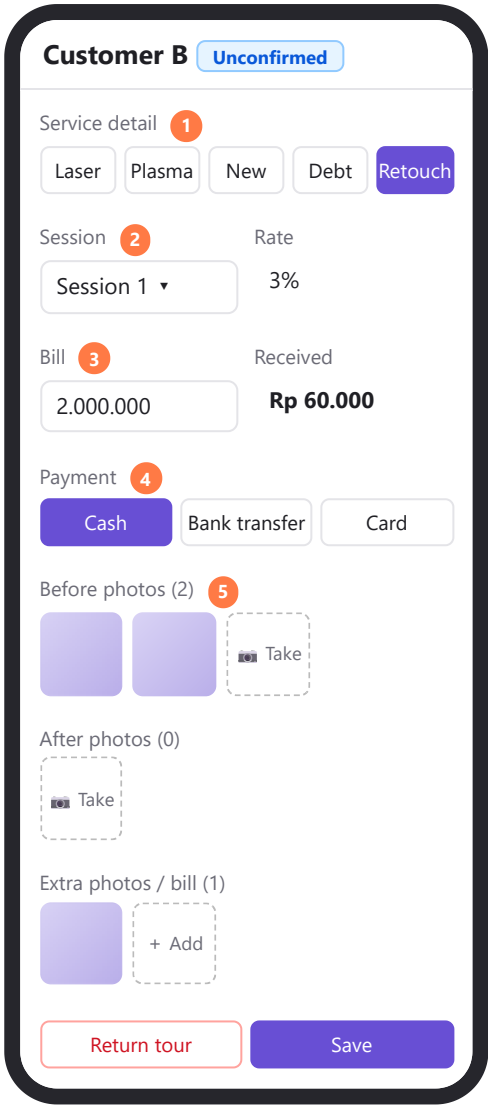

Waiting tab on a phone

Step 2 — Fill in the tour

In the tour details (open it by tapping its card in **My tours**):

1. **Service detail** 1: one of **Laser · Plasma · New · Debt · Retouch**.
2. **Session** 2: required for **Laser, Plasma, Retouch** (Session 1 … Session 20). Locked for New and Debt.
3. **Rate** appears automatically from the service detail + session — nothing to enter.
4. **Bill** 3: what the customer paid (Rupiah), numbers only. If Customer Care already entered it, double-check it.
5. **Received** is calculated automatically = Bill × Rate.
6. **Payment** 4: **Cash · Bank transfer · Card**.
7. **Note**: add anything useful.
8. Tap **Save**.

Tour details (technician)

Received-amount rates

SERVICE DETAIL	SESSION	RATE	EXAMPLE: BILL RP 2.000.000
Laser (brows)	Any	0%	Rp 0
Plasma (lips)	Any	0%	Rp 0
New	—	7%	Rp 140.000
Debt	—	7%	Rp 140.000
Retouch	Session 1	3%	Rp 60.000
Retouch	Session 2 and later	0%	Rp 0

Step 3 — Take photos 5

At the bottom of the tour details there are 3 photo groups:

PHOTO GROUP	BUTTON	WHEN
Before photos	📷 Take photo	Before you start — opens the back camera.
After photos	📷 Take photo	Right after finishing, same angle as before.
Extra photos / bill	+ Add photo	Bill, transfer screenshot — **several at once** from the gallery.

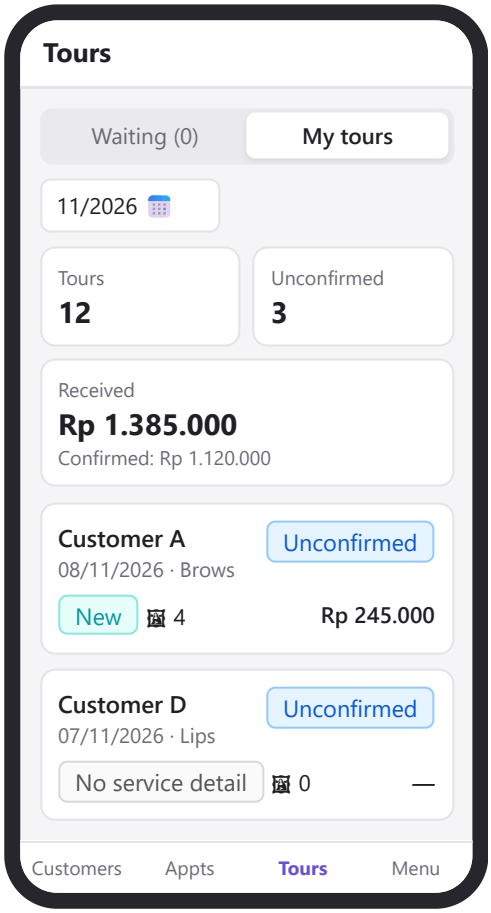

- Photos **save automatically** once uploaded (you'll see "Photo saved") — no need to tap Save.
- Wrong photo: tap the × on it → confirm **Delete**. Max 30 photos per group.

> **Before finishing a tour, check these 4 things:** service detail (+ session), bill, payment method, before/after photos. The admin **cannot confirm** a tour without a service detail or bill — it will stay "Unconfirmed".

6. Viewing your tours and earnings (Technician)

Go to **Tours** → **My tours** tab. It only shows tours **you have taken**, month by month.

1. **Pick the month** in the month box at the top (current month by default).
2. Check the 3 figures:
   - **Tours** — how many tours you did this month.
   - **Unconfirmed** — tours the admin hasn't approved yet.
   - **Received** — your total for the month; the small line "**Confirmed: …**" is the part already approved.
3. Browse the cards: customer, date · service, status, service detail, photo count and received amount for each tour.
4. Tap a card to open and edit it (if not confirmed). Tap the **photo icon** on a card to quickly view before / after / extra photos — tap a photo to enlarge, swipe to see the next one.

My tours tab

How to read a tour card

ON THE CARD	MEANING / WHAT TO DO
No service detail	You haven't picked the service detail → open the card and fill it in now, otherwise the tour earns nothing.
Received shows —	Missing service detail, session or bill.
🖼 0	No photos yet — remember the before/after photos.
Unconfirmed	You can still edit it. Waiting for admin approval.
Confirmed	Finalised, view only — can't be edited or returned. If something is wrong, tell the admin.

> **End of month:** open **My tours**, pick the month and compare **Tours** and **Received** with your own records. If there are still "Unconfirmed" tours, check each one has a service detail + bill, then remind the admin to approve them.

7. Admin tasks

- **Confirm a tour:** open the tour (or ⋮ at the end of the row) → **✓ Confirm**. The tour needs a **technician, service detail and bill**. Confirmed by mistake → open the tour → **Unconfirm**.
- **Assign / change technician:** the **Technician** field in the tour details (when a technician forgot to take the tour, or the wrong person took it).
- **Group by technician**, **Export Excel** and **Tour slip (PDF)**: export the currently filtered rows of the month — one slip page per technician with a signature area.
- Admins can edit and delete any tour, including confirmed ones.

FAQ

Can't find the customer when booking / creating a tour?

The customer isn't in the system yet. Create them under **Customers** first, then come back. Try searching by phone number instead of name.

Error: "This tour was already taken".

Another technician took it a few seconds before you. Reopen the **Tours** tab (or reload the page) to refresh the list and take another tour.

Error: "Tour is confirmed — only admins can edit".

The tour has been approved and locked. Ask the admin to edit it or unconfirm it.

Error: “Technician, service detail and bill are required before confirming”.

The technician in charge needs to open the tour, fill in the service detail and bill, tap Save, then the admin confirms again.

A technician has no “Waiting” tab, or sees “Only technicians can take tours”.

The account isn't set to the **Technician** department. Ask the admin to set it under Users.

Tapping “Take photo” doesn't open the camera.

Allow the browser / app to use the camera in your phone settings. If it still doesn't work, take the photo with the normal camera and add it through **Extra photos / bill**.

What's the difference between an Appointment and a Tour?

An **Appointment** = when the customer is scheduled to come and whether they've arrived. A **Tour** = the actual treatment: who did it, bill, photos, commission. A customer who comes in for treatment → 1 appointment (Arrived) and 1 tour.
